 - **Mobile Development:** Familiarity with React Native architecture
 - **Programming & Tools:** Python, Java, C/C++, Git/GitHub, VS Code, Antigravity
-

PROFESSIONAL EXPERIENCE

iReply Back Office Services Inc. | Intern | March 2026 - May 2026

- Engineered LogicQuest, a web-based company engagement and gamified learning system utilizing the Laravel framework and React to enhance internal employee training and operations.
- Conducted end-to-end troubleshooting for VoIP systems to ensure stable connectivity and communication reliability.
- Collaborated on a company engagement system using web-based solutions to enhance internal operations.
- Developed technical documentation and user guides to streamline system maintenance for developers and end-users.

TUP Visayas - Registrar's Office | Technical Support Intern | August 2023 – September 2023

- Audited document inventories and office resources to support organized record management and operational efficiency.
 - Managed departmental records ensuring compliance with administrative standards for efficient tracking and retrieval.
-

TECHNICAL PROJECTS

LogicQuest: Company Engagement & Gamified Learning Platform

- Co-engineered a full-stack, web-based company engagement system designed to enhance internal operations and employee onboarding.
- Integrated a high-performance React frontend with a robust Laravel Breeze backend architecture to ensure secure, rapid data routing.
- Implemented continuous-build asset compilation using Vite to streamline code maintainability and user experience.

Task-to-Tree: Task Management System

- Built a role-based web application featuring secure authentication and database integration using PHP and MySQL.
- Developed comprehensive CRUD functionalities and progress tracking to monitor task statuses.
